

Key Features and Benefits

MOBILE ARMOR™

Your data. Secure. Anywhere. Anytime.

Key Feature	Mobile Armor	Benefit
Centralised security policy management of all mobile devices		Reduced management overhead, unparalleled visibility of threat and/or compliance
Transparent key management		Simple deployment across all non-technical staff; simple secure challenge-response if password is lost
Simplified deployment using existing (MSI) technology		Proven, simple deployment vehicle
Advanced central auditing/reporting		Ease of mandatory compliance reporting
32-bit pre-boot kernel with network support		Prevents access to OS vulnerabilities should a device be compromised
Military-grade encryption Strong file/folder encryption for local and removable media		Real-world solution that recognises the use and proliferation of removable media
FIPS 197 and 46-3 (AES and 3DES Respectively) FIPS 140-2 Certified Common Criteria EAL 4 and BITS in progress		Highest level of compliance against promulgated standards. Simplifies tender/purchasing requirements
Licensed by user, not device		A single user may have many devices but requires only ONE license, greatly reducing your cost of ownership
